Hi Dan,

Here are two additional questions for my story that have come up:

- Last year, in a document for its AGM for the Catalyst funds III and IV, the funds listed as a possible asset under "Wind litigation" a total amount of \$448-million. We were curious to find out how and why this sum was included?
- As well, are the legal costs Catalyst is accruing being paid by the management company, or from the funds themselves?

We haven't heard from you in respect to whether you guys are planning to answer our questions (we received your lawyer's letter). Perhaps you can let me know what's happening.
